These are the body measurements and sizing we use to build our patterns. Ease is added to these measurements by the designer to achieve their desired "look". Jill Wolcott Knits® maintains consistency between sizes to the extent stitch patterns allow.

Choose your size based on your body measurements. Our patterns will always be based on those measurements. Averaged (S/M/L-type) sizing is an average of sizes within that size. This is then your Jill Wolcott Knits® size; you should always refer to the pattern for finished measurements which will tell you how much design ease is in the garment.

This is not a comprehensive list of measurements, but is generally what is used for standard-size patterns. If making custom-size garments there are considerably more measurements that might be used. Email us to let us know if you would be interested in learning more.

SIZING GUIDELINES

HPS*
 This is an imaginary line where your neckline and shoulder line intersect. It stands for "High Point Shoulder" which would be the tip of a shaped shoulder at the neckline.
