technique links, in alphabetical order

The technique instructions used in this pattern are provided as an aid in reproducing my designs. My samples are knit by a knitter, following these instructions, so I know they work.

When you encounter a new-to-you technique, I recommend practicing it using practice yarn before working it in the design. Some of my techniques can be a little tricky or fiddly, but they get great results, and learning them will pay off for you when you can apply them to future projects.

written stitch patterns for swatching

These are the stitch patterns used in the Porto Headscarf and are presented here for ease of swatch knitting and reference.

I recommend that you always use the flexible long-tail cast on for any swatch to be sure your cast on isn't distorting your knitting. For the same reason, I always bind off using JSSBO. Your swatch is a perfect place to practice any of the techniques introduced in this pattern.

If you would like to practice GSRs after you get the Porto Headscarf pattern, put your stitches on waste yarn to wet block so you can access live stitches.

Stitches to Cast On

Choose the appropriate number of stitches from the table on page vii. The stitch numbers allow for the + 2 stitches included in the instructions. I am giving you permission to only work 2.5" to 3" of each pattern in length/ depth. You can use these formulas to calculate your 4" gauge.

Using size _____ needles, and the flexible long-tail cast on, CO_____ sts.

After casting on, work Rows 1 and 2.

Row	Garter
1 [RS]	Knit
2	Knit

Fisherman Rib

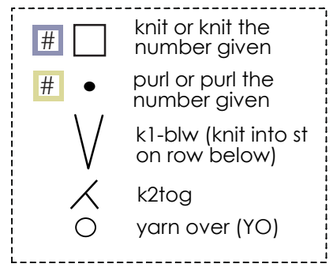
multiple of 2 sts + 2

Row	Begin	Fisherman Rib	Repeat	End
3 [RS]	K1, PM	k1-blw, p1	to the last st	PM, k1
4	P1	k1-blw, p1	to the last st	p1
5	K1	k1-blw, p1	to the last st	k1
6	P1	k1-blw, p1	to the last st	p1

Work Rows 5 and 6 to desired depth.

Table of Stitches to Cast on for Porto Headscarf

Sts per In/ 2.54 cm	Sts to CO
2.5 / 3	20
3.5 / 4 / 4.5	26
5 / 5.5 / 6	32
6.5 / 7	38
7.5	44
8 / 8.5 / 9	50



For both 1 and 2 below, cross multiply [(A) x (C)]. Divide the result by (B) = (X)

1. Fisherman Rib Row Gauge = $\frac{\text{rows counted (A)}}{\text{in or cm measured(B)}} \times \frac{\text{rows needed (X)}}{\text{4 in or 10 cm (C)}} \rightarrow$ *round this to the nearest 0.5" or to the nearest 0.1 cm*

2. Eyelet & Stockinette Row Gauge = $\frac{\text{rows counted (A)}}{\text{in or cm measured(B)}} \times \frac{\text{rows needed (X)}}{\text{4 in or 10 cm (C)}} \rightarrow$ *round this to the nearest 0.5" or to the nearest 0.1 cm*
