there is a formatting system!

Bold, lowercase, purple headlines, centered. Used for main parts of the pattern: information you can use, road maps and schematics, techniques, basic stitch patterns, directions.

directions blue kanu full back

Bold, UPPERCASE, purple subheads, centered. Sections of the written/charted Instructions.

A – TWIN RIB NECK TRIM

Bold, Sentence case, purple subheads, left aligned. Subheadings within Sections, chart headings.

Twin Rib Row/Rnd 1 Action chart

Italics, sentences/paragraphs. Appear after subheads and within written instructions. Used to communicate that I am talking to you and making suggestions.

This method puts you in charge, and allows you to work your size easily.

Text, sentences/paragraphs. Gives information directly related to how to work within the Section.

Using US size 4[3.5mm]

Bolded Text. Identifies other Sections referenced or something important to notice.

This Section is only worked by **Sizes 12 and 14.**

Underlined text. Emphasis on a detail or instruction (instead of plain bolded text).

Work only one version of Inc Rnd 3 as instructed

Hyperlinks, underlined, blue, any text. Used to link to other parts of the pattern and outside links for information.

Please read How to Proceed

Tables, Text. Presented so written instructions align with your knitting on the needles.

Row / Rnd	Twin Rib	Repeat

NEW!!! Bold, Dark Purple, text. This instruction means it might look wrong, but it isn't!

- *Don't panic*

NEW!!! Tech Heading Hyperlink. All Technique headings are hyperlinked to the online technique library.

flexible long-tail cast on

how to proceed

- ***Don't panic*** *when you see how many pages there are! Think of this as a tutorial handbook, not just a pattern. I guide you through everything. Skip what you don't need!*

- *There is an Accelerator for the Blue Kanu pattern if you want to just jump in. It can also be used as a guide or an action outline.*
  - *Within the **Accelerator**, use the hyperlinked page numbers to go to the pattern text.*
  - *Use the **Accelerator** to: 1) check off progress, 2) make notes, and 3) find the place you want to go in the pattern.*

- *I suggest paging through this Guide to see what is here, and review the Accelerator & Table of Contents of the written and charted instructions.*

- *The actual written and charted pattern is 38 pages long, with almost half of those pages containing only the Action charts.*

- *The Guide pages presented before the pattern use lower-case roman numerals. The actual written pattern pages begin numbering at page 1.*

- *Footers also indicate what is on each page.*

- *I find it easier to make the measurements legible and useful by presenting them in text table rather than in schematics.*

- *There are multiple pages of measurements in this beginning part of the pattern.*

- *There are lots of hyperlinks in this document. I keep all the information within one document so you can use the hyperlinks to get information within the pdf. Jump forward and backwards, to get to information you need as you go.*

- *It is always my goal in a pattern to guide you through how to work each step, but any skip information provided that you don't want to use.* ***Just work rows as indicated****.*

- *My patterns are designed so you can keep moving ahead without having to look backwards; move your place marker down the page as rounds/rows and sections are completed.*

- *There is a **Device version** set up with written instructions and charts side-by-side. Use that version on your device.*

- *There is a **Print version** which is page by page, so you can print pages you want to work from paper. When printing pages the pattern portion of the pdf is going to print differently because page 1 of the pattern begins on page 34 of the document. The footer tells you what the print page will be.*

- *Calculators on my website are linked for ease of use; the information is not saved, so you should **write it down or take a screen shot** before leaving the page.*
